```cpp
#include <string>
#include <cctype>
#include <iostream>
using namespace std;

int main()
{
    string s;

    cin >> s;

    if (! (isalpha(s[0])||s[0]=='_') ){
        cout << "no";
        return 0;
    }

    for (int i=1; i<s.size(); i++){
        if ( !(isalpha(s[i])||isdigit(s[i])||s[i]=='_') ){
            cout << "no";
            return 0;
        }
    }

    cout << "yes";
    return 0;
}
```
